

Ethical Computer Hacking

October 28 – December 16

The Fundamentals of Penetration Testing and Ethical Hacking

This course introduces students to penetration testing, helping them gain a valuable skill set in penetration testing by understanding the importance of vulnerability assessments and ethical hacking.

The course provides in-depth labs that focus on both open source and commercial based tools with industry best practices. These hands on labs emulate real world hacking scenarios and equip the candidate to assess a company's security posture, help implement controls to better secure a company's network infrastructure and how to combat against hackers and/or viruses.

Certification is awarded after completion of the course and a multiple-choice exam delivered online through a standard web browser (minimum score of at 70 %). This course is offered through the Wayne State University College of Engineering, Department of Computer Science. For more information, email cybersec@wayne.edu.

Who Should Attend?

- Network Administrators
- Site Administrators
- Security professionals
- Security Officers
- Auditors

Friday, October 28 – December 16, 2016 • 10:00 a.m. – 3:30 p.m. • \$1899 *Fee includes materials.*
The course is also available for Computer Science credit (CSC 5991-901/18583). Inquire for details.

Registration (by telephone, mail or fax)

313-577-4665 (M-F, 9 am—4 pm) or 313-577-4354 (fax)

Register and pay by credit card on or before October 14, 2016.

No refunds will be given after the course starts.
